²⁰ Notes from discussion with domain expert

²¹ According to a 2021 survey of over 40,000 Indian households, the *destitute* category saved only about ₹5,000 annually (approximately ₹420 per month). Source - <https://www.statista.com/statistics/1450072/india-household-saving-by-income-class/>

Parameters	Persona 1	Persona 2	Persona 3	Persona 4	Persona 5	Persona 6
					Data source: Notes from discussion with YUVA -Street vendors keep some savings.	
Physical assets			Assumption: They have a second hand scooter bought for Rs 40,000			
Prioritization	As a household they prioritize education followed by rent and food.	After rent and food, they prioritize health expenditure followed by transport, utilities and internet, communications.	They prioritize work-related costs, followed by bribes which they have to give and repair costs. This is followed by education expenditures given the need to keep their children in private school	After paying rent, they prioritize loan repayment to avoid harassment from money lenders followed by health, food expenditure.	They prioritize house expenditure since they have a family, followed by work and other expenditures related to work.	They prioritize transport and bribe as it is required the most for them to continue their work. This is followed by expenditure on mobile internet required for work and loan repayment if any
